

Hydraulic Drawbar

Keep on track...

Introducing the newly improved MBW Hydraulic Drawbar, easily and effectively keeps your pull-type implement on track.

Getting off track on a job can be frustrating and expensive. MBW's easy to use Hydraulic Drawbar provides excellent row tracking for any pull-type implement. Saving you time, but more importantly, your crops.

The MBW Hydraulic Drawbar has up to 26" of swing movement, allowing up to 13" of off-line correction in both directions.

- Use it on:**
- Pull-Type Sprayers
 - Anhydrous Side Dresser
 - Planters
 - Strip Till Machines
 - And more!

Crop Damage

HOW IT WORKS

As the tractor leans on a side-hill, the MBW Hydraulic Drawbar will automatically adjust, keeping the implement tires from damaging the crop. When following rows around a contour, the MBW Hydraulic Drawbar can be manually adjusted.
